Ex. No. 3	RESPONSIVE WEBPAGE USING HTML5 AND CSS3
Date of Exercise	**04/08/2026**
GitHub Host Link	https://pranavkrishna136.github.io/web-tech-lab/

Aim

To design and develop a simple yet structured **HTML5-based Comic Book Store website** using essential HTML5 tags and CSS3 properties, demonstrating the use of **semantic elements, text formatting, hyperlinks, lists, tables, images, backgrounds, margins, padding, and responsive layouts**.

Description

This experiment involves creating a simple **Comic Book Store** webpage using HTML5. The webpage includes **headings, paragraphs, comic book images, tables, lists, hyperlinks, and comments** to present comic collections, best-selling comics, and membership details.

CSS3 properties such as **background colors, text colors, margins, padding, fonts, borders, and responsive layouts** are applied to create an attractive, colorful, and user-friendly comic store interface. The webpage also demonstrates basic **responsive design** to ensure proper display on different screen sizes.

Procedure:

- Create a new HTML5 file named **`index.html`**.
- Add the basic HTML5 structure using `<!DOCTYPE html>`, `<html>`, `<head>`, `<title>`, and `<body>` tags.
- Design the **Comic Book Store** webpage using `<div>`, headings, paragraphs, images, tables, and hyperlinks to showcase comic books and store information.
- Create a **Comic Membership Form** using `<form>`, `<fieldset>`, `<label>`, `<input>`, `<select>`, and `<textarea>` to collect customer details.
- Use the `<progress>` element to display the customer's **Membership Reward Progress** or **Comic Collection Completion**.
- Add multimedia content using `<audio>` for theme music, `<video>` for a comic trailer, `<embed>` for a comic catalog/PDF, and `<iframe>` for an official comic-related webpage.
- Apply CSS3 styling to the webpage using **colors, fonts, margins, padding, borders, backgrounds, and responsive layouts**.
- Save the files and open **`index.html`** in a web browser.

- Verify that all webpage elements, including the **form, images, hyperlinks, audio, video, embed, iframe, and progress bar**, are displayed and functioning correctly.

Program

HTML

```
<!DOCTYPE html>

<html lang="en">

<head>

    <meta charset="UTF-8">

    <meta name="viewport" content="width=device-width, initial-scale=1.0">

    <title>Comic World - Comic Book Store</title>

    <!-- External CSS -->

    <link rel="stylesheet" href="style.css">

</head>

<body>

    <!-- Header -->

    <header>

        <h1>✹ COMIC WORLD ✹</h1>

        <p>Your Ultimate Comic Book Store</p>

    </header>

    <!-- Navigation -->

    <nav>
```

```
    <a href="#">Home</a>
    <a href="#">Comics</a>
    <a href="#">Characters</a>
    <a href="#">New Arrivals</a>
    <a href="#">Contact</a>
</nav>

<!-- Hero Section -->
<section class="hero">
    <h2>🔥 Welcome to Comic World! 🔥</h2>
    <p>
        Discover legendary heroes, powerful villains
        and amazing adventures under one roof.
    </p>
</section>

<!-- Comic Books -->
<section class="comics">

    <div class="comic-card">
        <h3>  Superhero  Adventures</h3>
        <p>
            Join powerful heroes as they fight villains
            and protect the world.
        </p>
```

```
    <p class="price">₹299</p>
    <a href="#" class="buy-btn">Buy Now</a>
</div>

<div class="comic-card">
    <h3>🕷 Web Warrior</h3>
    <p>
        Follow the adventures of a young hero
        with incredible spider-like abilities.

        width: 95%;
    }
}
```

Output

Result

The **Comic Book Store** webpage was successfully designed and executed using **HTML5 and CSS3**. Various HTML5 elements such as **headings, paragraphs, images, hyperlinks, tables, forms, lists, multimedia elements, progress bar, fieldset, labels, input controls, and comments** were implemented successfully. CSS3 styling was also applied to create an attractive and responsive interface, and the webpage displayed the expected output correctly in the web browser.
